Environmental Health Services

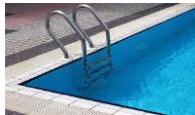

Fulton County Environmental Health (EH) Services provides control and prevention through a combination of surveillance, education, enforcement, and assessment programs designed to identify and abate the environmental conditions that adversely impact human health.

Fulton County Environmental Health Services programs include:

FOOD SERVICE

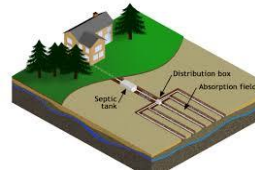

The goal of the Food Service Program is to reduce the risk of food-borne illness. EH Services permits facilities and conducts food service inspections, provides education, investigates complaints, and assists the Epidemiology Section with food-borne illness investigations.

SWIMMING POOLS

The goal of the Swimming Pool Program is to minimize illnesses and injuries associated with contaminated or hazardous conditions in or around swimming pools that are permitted for

operation in the State of Georgia. EH Services permits facilities, conducts swimming pool inspection, provides education, investigates complaints, and assists the Epidemiology Department with water-borne illnesses.

LAND USE

The Goal of the Land Use Program is to reduce and prevent the existence of many diseases and various types of gastrointestinal problems that may be transmitted through the fecal contamination associated with improperly maintained septic systems. Primary duties include oversight and regulatory compliance to ensure the proper disposal of human wastes.

TOURIST ACCOMMODATION

The goal of the Tourist Accommodation Program is to minimize illnesses and injuries associated with unsanitary or hazardous conditions in Georgia's tourist accommodations. EH Services permits facilities, conducts routine inspections at a minimum of twice per year, and assures compliance with regulatory policies.

RAT CONTROL

The goal of the Rat Control Program is to regulate the rat-proofing of all existing commercial buildings. EH Services provides education, distributes rat control material to homeowners, and issues notices and citations to violators of the provisions of the regulations.

NUISANCES

The Goal of the Nuisance Program is to minimize whatever renders or tends to render soil, air, water or food impure or unwholesome. Specific nuisances: conditions conducive to the breeding of flies or mosquitoes. Any foul or decaying material kept, used, or disposed of in such a manner that it becomes offensive, objectionable or detrimental to health or well-being.
